

US Military Endorsement

AFS 150 and 9m Monopoles

Remote Arctic Installation

Military Contact Wrote: “..... We found that the ARE towers were much easier to install and uninstall. Also, in our case the lattice tower failed whereas the ARE towers survived even when the wind turbines did not survive.

The snowy picture is after installation. The other picture is what was left after the winter. Note the lattice tower with wind sensors has collapsed whereas the ARE tower in the background is still standing”.
